Spanish ▬▬▬▬▬

💗 Soft Skills

Self directed

Able to take initiative

Appreciate responsabilities

Dynamic and enthusiastic

🪪 Profile

Passionate about computer science and blockchain technologies, I am looking for an internship that combines these exploding fields.

🎓 Education

DUT Informatique, *IUT of Annecy*
2022 | Annecy, France
  2-year university diploma in computer science.

Baccalauréat, *Lycée Simone Weil*
2020 | St-Étienne, France
  High School diploma.

💼 Professional Experience

Tobacco "Le Memphis", *University Project*
Mar 2021 – Mar 2022 | Bellignat, France
  Design, **development** and **integration** of an online shop for a tobacco shop. Implementation of a Click&Collect service and a complete administration panel. Technologies used : **Vue.Js**, **Nuxt.JS**.

Students association "BDE Odin", *Vice-président*
2021 – 2022 | IUT of Annecy, France
- **Teamwork** and **management** of the various members of the association.
- **Responsibility** for the management of the premises and their layout.
- Financial management and **organisation** of sales accounting.
- Search for new sponsors, **negotiation** of existing agreements.
- **Taking initiatives** for the development of the different poles: setting up a payment terminal, creating a sponsorship site between promos, etc.

Aquatic Center of Villard-de-Lans, *Lifegard*
Jul 2021 – Jul 2021 | France
- **Supervision** in a varied environment (indoor and outdoor pool, wave pool, slides).
- Continuous **concentration** over long periods of supervision.
- **Anticipation** and **prevention** of accidents.
- **Teamwork** and **dynamism**.

🎖 Certificates

Boating license *(In progress)*

National Security and Rescue Certificate (BNSSA)

Cambridge English Level Assessment : B2

BIA : French aeronautical initiation certificate

📁 Projects

What To Trade - Personnal Project ↗
WTT automatically analyzes the crypto-currency market to allow traders to get a quick overview of charting opportunities.
Technologies used: Python, Flask, REST API.

AI Bitcoin - Personnal Project ↗
A Python script that uses a recurrent neural network (RNN) and LSTM to predict the Bitcoin price in period N+1 from the previous 30 periods.

BlaBlaNight - Personnal Project ↗
A simple and intuitive web-app that allows students of the IUT of Annecy to carpool to nightclubs.
